

CRAWFORD COUNTY BOARD OF SUPERVISORS
February 20, 2018

The Crawford County Board of Supervisors met in regular session at the Crawford County Administration Building in Prairie du Chien, Wisconsin on February 20, 2018.

The Board was called to order by Chairman Tom Cornford. Roll was called with Supervisors Dull, Kuhn, Orr and Rogers being excused. Chairman Cornford led the Board in the Pledge of Allegiance.

The meeting was verified as being properly posted.

Motion by Kelley, second by Flansburgh to approve the minutes of the previous meeting. Motion carried unanimously.

Chairman Cornford announced that he would like to appoint Karen Reilly and Jane Schaaf to the Health Committee.

Motion by Lorenz, second by Stirling to approve the appointments to the Health Committee. Motion carried unanimously.

RESOLUTION NO. 1-2018

**RESOLUTION URGING THE STATE TO RECOGNIZE LOCAL SENSITIVITIES,
LOCAL CONTROL, AND IMPROVE OVERSIGHT OF WPDES PERMITTING
PROCESS**

WHEREAS, it is widely recognized that Crawford County is underlain by a sequence of highly fractured, dissolved and permeable carbonate (hereafter “karst”) and sandstone bedrock; and

WHEREAS, Wisconsin’s most recognized karstic areas are in the northeastern part of the state, thanks to the work by the Northeast Wisconsin Karst Task Force, which published its final Report in 2007. The karst geology of the Driftless area is less well studied, but is more intensively developed due to the uninterrupted dissolution during the two million years of the Pleistocene ice ages further enlarging the karst features and water sensitivities; and

WHEREAS, evidence of this solution is widespread in features of the surface landscape; the most obvious surface features in the Driftless area are the many thousands of small to large sinkholes, formed when underground caves and streams collapse. Many caves and subsurface channels have yet to be recognized. Other karstic features include “disappearing streams” and “blind valleys”, where surface flows dive into the ground.

WHEREAS, typical rates of groundwater flow are measured in inches per day, but in karstic terrain underground waters can flow hundreds of feet per day; and

WHEREAS, this means that our groundwater is exceedingly susceptible to contamination by flocculant ponds from mining operations, underground fuel or chemical storage tanks, improperly spread manure, failure of manure, coal-ash, or other impoundments, and even by carelessly applied fertilizers; and

WHEREAS, once a sandstone aquifer is polluted, it will remain polluted for millennia, with no way to remediate the pollution besides water filtration systems, causing an environmental justice and public health crisis; and

WHEREAS, any rules for siting or regulating Concentrated Animal Feeding Operations (CAFOs) or other industrial operations generating large amounts of potential pollutants in karst regions should take into account the local geological sensitivities, in addition

to requiring detailed studies performed at any specific proposed site, but these contingencies do not exist in the current regulatory framework for Crawford County or Wisconsin; and

WHEREAS, a detailed, regional geologic analyses has not yet been completed to identify areas of particularly susceptible groundwater; and

WHEREAS, the state has recognized that current regulatory framework failed to protect groundwater resources in karst areas in eastern Wisconsin; and

WHEREAS, the Wisconsin Department of Natural Resources (DNR) administers the Wisconsin Pollutant Discharge Elimination System (WPDES) Program, which regulates the discharges of pollutants to surface and groundwater from concentrated animal feeding operations, mines, industrial wastewater treatment facilities and municipal wastewater treatment plants and;

WHEREAS, the nonpartisan State of Wisconsin Legislative Audit Bureau reviewed the DNR's performance implementing the WPDES Program and found in Report 16-6, dated June 2016, that the DNR failed to administer and maintain a WPDES permit program consistent with the requirements established under the Clean Water Act and Chapter 283, Wis. Stats; and

WHEREAS, 98% of the required self-monitoring annual reports were not electronically recorded by the DNR and, therefore, not available to DNR staff responsible for monitoring compliance and enforcing regulations; and

WHEREAS, the result of industrial agricultural contributions of fertilizer and manure runoff into surface water and groundwater shows increasing levels of phosphorous, nitrates, and bacteria in the water supply leading to degraded water quality and water quantity; and

NOW, THEREFORE, BE IT RESOLVED the Crawford County Board of Supervisors determines that a situation exists which threatens the public health, safety, and welfare of the citizens of Crawford County and that the Crawford County Board of Supervisors:

Urges the state to respect local control and flexibility by allowing for county and municipal ordinances which take science-based measures beyond state standards to protect our sensitive water resources, as was done for counties in the eastern part of the state through Wisconsin administrative code changes.

Urges the Wisconsin DNR to strengthen its commitment to protecting our natural resources and the welfare of our residents by improving their oversight and meeting their statutory requirements of the WPDES permitting process in regards to the CAFO Program.

Respectfully submitted by,

CRAWFORD COUNTY LAND CONSERVATION COMMITTEE

Henry L. Esser David Olson
Harriet Behar

Dave Troester, County Conservationist, appeared before the Board and wanted the County to recognize that Southwest Wisconsin has the same geology as the Eastern part of the State. The water quality in the Eastern part of the State is not good and it is estimated that 30% to 40% of the private wells are contaminated by animal manure. Within the past couple of months, the State Natural Resources Board has unanimously passed changes to the DNR Code. This allows more regulating of applying manure to areas that have shallow or rocky soils.

Crawford County has one CAFO and the County is trying to stay ahead of the game as far as well contamination. There are no records of well testing in Crawford County and someone is needed to gather that information. The DNR has not been regulating and

monitoring CAFOs very well. This responsibility will be transferring to the Department of Agriculture. Dave displayed a map of the County which shows areas where there is shallow bedrock.

Motion by Esser, second by Olson to adopt the resolution. Motion carried unanimously.

Approved this 20th day of February, 2018.

Delinquent Tax Committee:

Derek Flansburgh, Chairperson
Kersten Rocksvold
Henry Esser

Treasurer Deanne Lutz addressed the Board and stated that the properties listed are 2014 properties with delinquent tax. There are 36 properties that will be sent to Corporation Counsel. The amount shown does not include interest and penalty. This doesn't include any of the prior years since they were listed the last time.

Motion by Flansburgh, second by Steiner to adopt the resolution. Motion carried unanimously.

Chairman Cornford stated we will now consider the Ordinance Repealing and Recreating Section 11.01 of the Crawford County Code or Ordinances Relating to Animal Waste Management. The Clerk gave the first reading.

ORDINANCE NO. 209-2018

AN ORDINANCE REPEALING AND RECREATING SECTION 11.01 OF THE CRAWFORD COUNTY CODE OF ORDINANCES RELATING TO ANIMAL WASTE MANAGEMENT

The Crawford County Board of Supervisors do ordain as follows:

Section 1. That Crawford County Ordinance Number 11.01 is hereby repealed and recreated to read as follows:

11.01 – ANIMAL WASTE MANAGEMENT

(2) DEFINITIONS

Animal waste storage facility. A concrete, steel, or otherwise fabricated structure, or an earthen facility constructed of dikes, excavated pits, or ponds, or a combination of these, used for temporary storage of animal waste. This ordinance applies to all facilities on one operation that stores a cumulative volume greater than 7,000 cubic feet or for a period of 30 days or longer. Methane digesters and animal manure stacking areas to not require a permit under this section. Further defined in Wisconsin Administrative Code ATCP 50.62(1).

(5) APPLICATION FOR AND ISSUANCE OF PERMITS.

(c) Fee. The application fee for a permit under this section shall be \$300. The permit fee will be payable upon submission of application for the permit. Permit fees will double if facility is constructed or closed prior to permit issuance. Permit fee for closure

of an animal waste storage facility will be waived if receiving cost-share assistance to complete the practice.

Section 2. This Ordinance shall become effective from and after its passage and publication as required by law.

Land Conservation Planning and Zoning Committee:

Henry Esser David Olson
Harriet Behar Don Dudenbostel
Wade Dull

Motion by Olson, second by Kelley to give the second reading by title only. The motion carried and the Clerk gave the second reading by title only.

Chairman Cornford asked for any questions or appearances.

Dave Troester, County Conservationist, explained that the Land Conservation Committee had approved forwarding the ordinance at their last meeting. The first revision of the ordinances pertains to definitions. Dave explained that there were certain definitions that needed clarification so that a person could not have numerous small pits or less than 30 days of storage and not be required to have a permit.

The second revision of the ordinance pertains to the fee. The amount of the fee has not changed however the amount of the fee would double if a facility is constructed or closed prior to a permit being issued.

Motion by Esser, second by Flansburgh that the ordinance be ordered engrossed and given the third reading by title only. The motion carried and the Clerk gave the third reading by title only.

Chairman Cornford stated the ordinance having been read three several times the question is "Shall the ordinance pass?"

Motion by Olson, second by Krachey to adopt the ordinance. Motion carried unanimously upon call of the roll.
