2023 Crawford County Tree Sale

Red Oak (*Quercus rubra*)

Hardy northern oak prized for its lumber and beneficial acorns. Dark waxy green leaves.

Moderate to well drained soil - Full to partial sun - Medium to fast growth..... 80-100 feet with 40-50' spread

Swamp White Oak (*Quercus bicolor*)

One of the faster growing oaks. Forms large canopy, prefers moist sites with some drought tolerance will also thrive on upland sites. Fast acorn production for food plot, preferred by wildlife because lacks the tannins found in acorns.

Moist to well drained soil - Full sun to partial shade - Medium to fast growth..... 80-100 feet with 60-80' spread

Black Walnut (*Juglans nigra*)

Fast growing, popular hardwood tree, nuts are thick shelled and full flavored. Tolerates cold climates. Food for wildlife, a good shade tree and valuable lumber species.

Moist to well drained soil - Full sun - Fast growth.....80 feet with 40-60' spread

White Birch (*Betula papyrifera*)

Most ornamental of all native birches. Chalky white bark peels in papery layers. Golden fall color.

Dry to wet soil - Full to partial sun - Fast growth.....80 feet with 25-35' spread

Sugar Maple (*Acer saccharum*)

Hardy maple valued for many woodland projects. Makes a great shade tree and is valued for its syrup and lumber. Brilliant fall color.

Average soil - Full to partial sun, shade - Moderate growth.....70 feet with 35-45' spread

White Pine (*Pinus strobus*)

Native five needle pine with a variety of uses: Timber, Christmas trees, windbreaks, wildlife habitat or ornamental.

Dry to average soil - Full to partial sun - Fast growth.....80-100 feet with 10-40' spread

White Spruce (*Picea glauca*)

Hardy northern spruce with stiff bluish green needles. Short needle length. Great bird habitat and thermal cover for wildlife, thick symmetric growth.

Moist, well drained soil - Full sun to partial shade - Fast growth75 feet with 20-40' spread

Serviceberry Downy (*Amelanchier canadensis*)

Masses of white, early spring flowers emerge before any trees leaf out, edible purple/red fruit in mid-summer, then bright yellow to red foliage in fall. Attractive to pollinators, blooms may last a week or more. A small multi stemmed specimen tree, does well in the shade, fruit production best in full sun however.

Moist to well drained soil - Full to partial sun - Medium growth..... 15-25 feet with 15-25' spread

American Hazelnut (*Corylus americana*)

A vigorous multi stemmed shrub, tolerant of varied soil types, dark green summer foliage turning bright yellow or burgundy in fall. Interesting floret type, seed pockets hold sweet filberts highly prized by man and beast.

The hazelnut is a must have on your land if you are planting for a hunting food source or wildlife viewing.

Adaptable to most soil types, plant two or more shrubs for proper pollination.

Dry, medium, moist soil - Full to partial sun - Fast growth.....10-15 feet with 8-12' spread

American Plum (*Prunus americana*)

Fast growing, with many wildlife benefits. In the spring, clusters of 1" white flowers will form, usually one of the first flowers to bloom in the woodlands. Fruit will form over the summer, and mature in August and September. This is an excellent choice for wildlife attraction.

Dry to wet soils - Full to partial sun - Fast growth.....15-25 feet height with 10' spread

Nannyberry Viburnum (*Viburnum lentago*)

In spring white flowers attract pollinators, autumn berries are tasty and fresh. Berries persist into winter for birds and small mammals. Deep red fall foliage. Excellent for moist areas.

Average to moist well drained soil - Full to partial sun - Moderate growth.....15-25 feet with 6-12' spread
